Instructions for JTSPS14M

Caution

If the warning LED lights up, the protection system will start and the power will shut down. Please turn the power switch off for 1 minute, then turn back on. This will reset the protection system.

Do not use the unit as a battery charger.

Do not use for motors. Motors require a very high current to start and may damage the power supply.

Do not block the air vents.

SPECIFICATIONS

Input Voltage	100-260 VAC
Output Voltage	4-16 VDC variable
Current	14 amp surge, 12 amp continuous
Short Protect	Warning LED light up
Over Voltage	Over 17V warning LED
Cooling	Automatic cooling fan
Fuse	3A at 230V/6A at 115V
Weight	1.2kg/2.7lbs
Dimensions	6.5" x 5.75" x 2.25"
